Data Structures & Algorithms

Assignment Title: DSA Assignment 1

Description: AVL Tree Implementation

Subject	Data Structures & Algorithms
Subject ID	1
Faculty ID	1
Semester	3
Maximum Marks	100
Due Date	10 July 2026

Problem Statement

Implement an AVL Tree supporting Insert, Delete, Search and Inorder Traversal. Demonstrate all balancing rotations (LL, RR, LR, RL) with suitable test cases.

Submission Instructions

1. Use C++, Java or Python.
2. Submit source code with comments.
3. Include complexity analysis.
4. Add screenshots of program output.
5. Upload before the due date.
